## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1 and 4-6 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Komatsu et al (US 3,930,041) in view of Ando (US 3,892,874).

References and rejection are incorporated as cited in a previous Office action mailed November 14, 2006.

## Response to Arguments

Applicant's arguments filed March 13, 2007 have been fully considered but they are not persuasive.

In regard to Applicants' argument that Komatsu does not disclose or suggest "boiling a measured quantity of beta noodles into a half-boiled state, in which a moisture content of the half-boiled noodles is within a range of 45 to 60 percent as a whole, until outside surfaces of the beta noodles are processed into an outer alpha layer." (p. 5 of the Reply to the Office action mailed 11/14/2006), it is noted that Komatsu et al disclose packing cooked or semi-cooked foods in sealed containers (Col.8 lines 20-45). Komatsu et al also disclose boiling as a method of cooking and "noodles such as spaghetti" as a food product (Col.8 lines 31-32, 38-39). Therefore Komatsu et al disclose boiling noodles to a half-boiled (semi-cooked) state and packing half-boiled noodles in a sealed container. As stated in the previous Office action, one of the ordinary skill in the art

Application/Control Number: 10/670,603

Art Unit: 1761

would have been motivated to vary moisture content of half-boiled noodles based on the desired level of elasticity, degree of gelatinization, luster and uniformity.

In regard to applicants' arguments that "the overpressure cooling step of Komatsu is not the slow-cooling of the claimed invention" and "Ando does not describe the technique of half-boiling disclosed by the claimed invention" (p. 6 of the Reply), it is noted that Ando discloses boiling noodles, packaging noodles in sealed container, and then cooling noodles. It is also noted that Komatsu teach that packaged article is naturally cooled while being transferred from heat-sealing step to the over-pressure cooling step. Since Komatsu et al disclose boiling noodles to a half-boiled (semicooked) state, packing half-boiled noodles in a sealed container and then cooling, and Ando discloses boiling noodles, packaging noodles in sealed container, and then cooling noodles, one of the ordinary skill in the art would have been motivated to modify disclosure of Komatsu et al and employ cooling step as taught by Ando. As was stated in the previous Office action, one of the ordinary skill in the art would have been motivated to vary cooling speed in order to avoid distortion in the packaged article. occurrence of waving on the sealed face and partial shrinkage of the packaged article.

#### Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Application/Control Number: 10/670,603

Art Unit: 1761

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vera Stulii whose telephone number is (571) 272-3221. The examiner can normally be reached on 7:00 am-3:30 pm, Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on (571) 272-1398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
